Preliminary Results of Census 2016 - the Western Region

Western Development Commission
25 October 2016

Dr. Helen McHenry, Policy Analyst
Preliminary census results

- Initial results - based on enumerators forms
- Subject to revision
- Only cover a small number of indicators (population by ED, migration and housing vacancies)
- 2011-2016 was a period of fluctuation and uncertainty in population trends. Helpful to have some detail now
- Trends for Western Region worrying
Population change

• The Western Region population was 828,124 people in April 2016. It increased by 7,244 people since 2011 (0.9%). The state population was 4,757,976. It increased by 3.7% between 2011 and 2016.

• Three counties in the Western region showed population decline (Donegal, -1.5%), Mayo (-0.2%) and Sligo (-0.1%)

• In all counties there was higher growth in the female population than the male population. In the Western Region there was a 1.5% increase in the female population and 0.2% in the male population. For the rest of the state the difference was less (males 4.2%; females 4.4%).

• More EDs in the Western Region experienced population decline (533) than showed population growth (433). 262 EDs had a population decrease of more than 5%. 16 had population decreases of more than 15%

Percentage change in the population of Electoral Divisions, 2006-2011
Components of Population Change

• Every administrative area in Ireland had a positive natural increase (more births than deaths) during 2011-2016. Donegal, Sligo and Mayo had enough negative net migration to lead to population decline.

• All western counties, and all but six areas nationally, had negative net migration between 2011 and 2016. Donegal and Sligo had the two highest rates of negative net migration nationally.

• The areas showing the strongest pattern of decline and low growth are concentrated in the Western Region and down the western seaboard while the areas of highest growth are concentrated in the east of the country.
Components of population change in western counties, 2011-2016

- Change in Population
- Natural Increase
- Estimated Net Migration

Clare: Change in Population -1,431, Natural Increase 3,994, Estimated Net Migration 2,563
Donegal: Change in Population -2,382, Natural Increase 4,349, Estimated Net Migration 1,967
Galway City: Change in Population -37, Natural Increase 3,975, Estimated Net Migration 4,012
Galway County: Change in Population 3,924, Natural Increase 7,082, Estimated Net Migration 3,158
Leitrim: Change in Population -174, Natural Increase 822, Estimated Net Migration 648
Mayo: Change in Population -3,033, Natural Increase 3,033, Estimated Net Migration 0
Roscommon: Change in Population 371, Natural Increase 1,642, Estimated Net Migration 1,271
Sligo: Change in Population 36, Natural Increase 1,976, Estimated Net Migration 1,640
Estimated net migration by gender in western counties, 2011-2016

- Clare: -1,491 Males, -1,012 Females
- Donegal: -3,857 Males, -2,874 Females
- Galway City: 286 Males, -943 Females
- Galway County: -2,225 Males, -1,130 Females
- Leitrim: -460 Males, -188 Females
- Mayo: -2,116 Males, -415 Females
- Roscommon: -856 Males, -775 Females
- Sligo: -1,237 Males, -775 Females

Housing

• In 2016 the Western Region had a housing stock of 404,494, an increase of 0.8% or 3,183 on 2011. Nationally the increase was 0.9% over this period.

• There was a decline in housing stock in three of the western counties – Roscommon -0.5% (-173), Sligo -0.2% (-51) and Leitrim -0.2% (-36), indicating some houses being taken out of the housing stock.

• Even with the limited growth in housing stock between 2011 and 2016 (0.8%), the growth in the housing stock in the Western Region during the decade 2006 to 2016 of 16.4% is still nearly double the population growth in the region over the same period (8.6%).

• The average vacancy rate in the Western Region in 2016 was 21.7%, marginally lower than that in 2006 (22.8%). Nationally, the average vacancy rate in 2016 was 19.9%.

@WDCInsights
Conclusion

- Worrying decline in population in 3 counties
- More than half of the EDs in the WR had population decline
- Out migration a significant issue (esp. male migration)
- More detailed information in the report circulated.
- Policy Team will analyse comprehensive census results as they become available. (Different themes will be released April-December 2017).
